EDUCATION

University of Waterloo

Bachelor of Computer Science, GPA: 91.6%

Waterloo, ON

Sept. 2025 – May 2030

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, Racket, C

Frameworks/Libraries: Next.js, React, PyTorch

Databases and Developer Tools: FastAPI, MongoDB, Git, Linux, IntelliJ, Bash, Excel

EXPERIENCE

AI Researcher

June 2024 – April 2025

UC Berkeley

Berkeley, California

- Built and evaluated two-model collaboration approaches where one AI model reviews and corrects another model's reasoning on the **GSM8K dataset (8,000+ problems)**
- Enabled mid-solution feedback using rationale-based guidance to improve multi-step mathematical reasoning
- Improved reasoning accuracy by **20–30%** on complex problems compared to single-model baselines

Teaching Assistant Internship

Feb. 2022 – June 2025

LIVE by Po-Shen Loh - Carnegie Mellon University

Remote

- Collaborated with Professor Po-Shen Loh (Carnegie Mellon University, USA Math Olympiad Coach) to deliver interactive math instruction to **400+ international students**
- Led LIVE Scholarship; mentored underrepresented students from low-income, federally funded schools

PROJECTS

Lingo Lift | Next.js, TypeScript, Azure Speech, Supabase

Sep. 2025

- Built a voice-first lecture accessibility platform supporting **real-time multilingual speech-to-text and translation**, processing live audio with **sub-2-second** end-to-end latency
- Developed adaptive learning features including **3-level lecture summaries**, AI-powered tutoring, and audio dubbing; validated usability through **10+ live demo users**

BiteWise | Python, FastAPI, MongoDB, Gemini API

Jan. 2026

- Built a receipt-to-health pipeline that parses **100+ line-item receipts** using OCR and Gemini API to generate allergen alerts, nutrition risk flags, and a **0–100 health score** with actionable recommendations
- Developed a full-stack web app with a weekly trend dashboard and accessibility features

Auto-Vlog Human-Following Robot | Arduino, ESP32-CAM, Computer Vision

Feb. 2026

- Built an autonomous rover that tracks and records a user in real time using ultrasonic sensors and ESP32-CAM video streaming
- Developed a web app that uses **Google Gemini** to edit recorded footage from robot based on user prompts (e.g., highlight reels, cinematic cuts, grayscale filters)

AWARDS/LEADERSHIP

Math Competitions

Sept. 2021 – June 2025

- Canadian Euclid Contest Award Winner - **Top 150/25,000+ globally**
- Canadian Intermediate Math Contest – **Top 60 nationally (Top 0.4%) in Canada**
- AIME Qualifier (**Top 5% of 300,000+ AMC participants**)

First-Year Representative – Waterloo Women in Computer Science

Dec. 2025 – Present

- Elected representative for **400+ first-year CS/Math students**, contributing to club-wide academic and professional development strategy
- Partnered with **Meta, NVIDIA, Google, Citadel**, and other industry sponsors to execute **5 large-scale initiatives** spanning technical workshops, mentorship programs, and recruiting events

DECA Competitor and Director (International Business Competition)

Sept. 2022 – June 2025

- 2x International Qualifier; Top 5/1000+ teams globally in Professional Consulting and Virtual Business events
- Ontario Provincial Champion; Mentored **15+ students**, with **3 advancing to internationals**
